

We all must preserve the living trees that we have in our area. We need them to survive or else we will all die. You cannot just go and cut down trees, I'm trying to make it a law. You must have a permit to cut down any amount of trees or else you will get fine \$250

Have you ever cut down a tree before if you did? Did you plant another one yes or no? People are cutting down trees everywhere .I hate it!! I like to climb in the trees everyday. Also the animals use the trees for shade during the hot days. Rabbit, deer and bears will have to find new shade and maybe there will not be any .If you cut down a tree you have to plant two more and take care of them for every.

Trees are important the human life form because they take in carbon dioxide and produce oxygen humans need oxygen to live. I like to play in the woods and if there is no trees there no woods. I have some woods in area but there is not a lot left. So I would like to try to save the rest of trees that are left. I also like to play in the woods with my friends. I like live in my wood because I stay in there for a long time.

These trees need to help us with our life .Now we can save all the trees that remain in our world. I would like to make that possible and make more trees for the world. I like all the trees that we have in our area .I hoped you will make my law a law.

Ryan
